

SEED & AGRICULTURAL TECHNOLOGY

SHORT COURSE

August 15 & 16, 2022

Bost Extension Center
MSU Campus

SPONSORSHIP OPPORTUNITIES

Platinum

\$3,000

Gold

\$1,000

Silver

\$500

Bronze

Under \$500

The 2022 Seed and Ag Tech Short Course focuses on management of precision agricultural information and data, carbon credit market economics, agricultural autonomous technologies, and prescriptive and high-speed planting technologies for seed and crop production. Principles of seed and grain storage and drying, grain bin maintenance, post-harvest pest management, industrial electrical safety, seed-borne diseases, and state and federal seed laws will also be discussed. Additionally, a hands-on demonstration and training in seed processing, cleaning, and conditioning equipment will be held on Aug. 16.

All sponsors can request a table or booth space for display, and logos will feature prominently on printed materials and digital displays at the short course.

Sponsorships and donations can be accepted through the MSU Foundation at msufoundation.com.

Please designate the sponsorship or donation as "Other" and write in "Seed and Ag Technology."

Thank you for your support!
